Frontend Developer specializing in building pixel-perfect, responsive, and feature-rich web applications using modern JavaScript frameworks. Experienced in developing scalable UI architectures with React, Next.js, and TypeScript. Skilled at translating product requirements into high-performance user interfaces and collaborating with backend systems to deliver seamless full-stack experiences.

EDUCATION

Pacific University, Udaipur

Graduated: March 2024

Bachelor of Computer Applications (BCA)

EXPERIENCE

Frontend Developer

May 2025 – September 2025

4Devnet Pvt. Ltd., Ahmedabad (Onsite)

- Built core features for an exam management platform, enabling location-based check-ins for proctors and real-time ticket creation for operational issues.
- Developed a fully responsive product detail page (PDP) inspired by IndiaMART, optimized for mobile-first UX and improved user interaction across devices.
- Collaborated with backend APIs to integrate real-time data and maintain smooth UI performance.
- Contributed to production-ready UI components following scalable React architecture.

PROJECTS

Chronos – Time Analytics Platform

Tech Stack: React, TypeScript, Redux, Tailwind CSS, Node.js, PostgreSQL, Prisma

- Designed and developed a time analytics web application that helps users understand how their time is spent through visual matrix-based analysis.
- Implemented a modern React architecture using Redux state management for predictable UI state.
- Built the entire application independently, including frontend, backend APIs, and database schema.

ChatFlow – Real-Time Chat Platform

Tech Stack: React, TypeScript, Redux, Tailwind CSS, Node.js, PostgreSQL, Prisma, Socket.IO

- Developed a real-time messaging platform supporting live communication using WebSockets.
- Implemented scalable frontend state management using Redux.
- Designed responsive UI components and optimized chat interactions for smooth real-time updates.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Redux, Tailwind CSS, Responsive Design

Backend: Node.js, PostgreSQL, Prisma

Tools: Git, GitHub, Postman, REST APIs, Socket.IO, AI Tools
